

Due to my illness (lung disease) I had been thinking about getting new energy-efficient windows for some time. I went online and researched the companies that could provide this service. I was not looking for the best deal – I was looking for the best windows and the best warranty to back up their work. After checking out your company, including reading all the reviews, I decided to go with you. I COULDN'T BE HAPPIER!

I have a total of 13 windows – 70% of these windows are on the north side. Downstairs, I either froze or burned and the electric bill was always high. Upstairs, I was always hot because all the hot air from downstairs came up, which also increased the electric costs (I have two air/heating systems). I could be in the middle of the living room and feel the draft coming from the windows.

Scott Cornwall and his crew came to my home on time and started their prep work. They were so professional and friendly. Having to do 13 windows, it definitely was an all day job. They kept their spirits high and were very conscious of my condition, having to be on oxygen 24/7. Scott and his crew were fabulous!

I also work for a large corporation that allows me to telecommute. I've had several peers who have told me they stopped by your booth during the state fair and were interested. I've already told them to stop by and check my windows out – they will be jealous.

I keep going by my windows and feeling no drafts – I love it!

Thanks Statewide,

Karen from Texas
